User Stories & Acceptance Criteria

EPIC 1: CUSTOMER JOURNEY MANAGEMENT

Truck Transportation Management System

v.001

Story CJ-001: Customer Registration and Onboarding

As a new customer
I want to register for an account and complete profile setup
So that I can start booking transportation services for my cargo

Acceptance Criteria

AC-001: Account Creation

Given I am a new user on the registration page
When I provide valid registration information (email, phone, password, company details)
Then I should receive email and SMS verification codes
And my account should be created in pending verification status
And I should be redirected to verification page

Business Rules:

- Email must be unique in the system
- Phone number must be valid UAE/GCC format (+971, +966, etc.)
- Password must meet security requirements (8+ chars, upper/lower/numbers/symbols)
- Company registration number validation (if provided)

AC-002: Account Verification

Given I have received verification codes
When I enter both email and SMS verification codes correctly
Then my account status should change to active
And I should be automatically logged in
And I should be redirected to profile completion page

Error Scenarios:

- Invalid/expired verification codes show specific error messages
- Maximum 3 attempts before account lockout (24 hours)
- Resend verification option available after 60 seconds

AC-003: Profile Completion

Given I have a verified account
When I complete mandatory profile fields (business license, billing address, contact person)
Then my profile should be marked as complete
And I should have access to full booking functionality
And my profile should be queued for admin approval if required documents are uploaded

Validation Rules:

- Emirates ID/Trade License number validation
- Address verification through mapping service
- Document upload (PDF, JPG, PNG max 5MB each)

AC-004: KYC Document Upload

Given I am completing my profile
When I upload KYC documents (Trade License, Emirates ID, Authorization Letter)
Then documents should be virus scanned and validated
And document status should show as "Under Review"
And I should receive confirmation email
And admin should be notified for document review

Performance Requirements:

- Document upload should complete within 30 seconds
- Virus scanning should complete within 5 seconds
- Image compression for files > 2MB

Story CJ-002: Advanced Booking Request Creation

As a verified customer
I want to create detailed transportation requests with specific requirements
So that I can get accurate quotes and suitable truck assignments

Acceptance Criteria

AC-001: Basic Booking Information

Given I am on the create booking page
When I enter pickup and delivery locations using address search or map selection

Then the system should validate addresses and calculate route distance
And estimated travel time should be displayed
And available service areas should be highlighted

Validation Rules:

- Both locations must be within service areas
- Minimum 1km distance between pickup and delivery
- Maximum 1000km distance for single booking
- Address geocoding accuracy validation

AC-002: Cargo Specification

Given I am specifying cargo details
When I enter cargo type, weight, dimensions, and special requirements
Then the system should validate weight/dimension compatibility
And suggested truck types should be filtered and displayed
And special handling fees should be calculated if applicable

Business Rules:

- Weight: 1kg - 50,000kg range
- Dimensions: Maximum 15m length x 3m width x 4m height
- Hazardous materials require special certification
- Refrigerated goods require temperature range specification
- Fragile items require special handling confirmation

AC-003: Scheduling and Timeline

Given I am setting pickup/delivery schedule
When I select preferred date/time slots
Then the system should check driver/truck availability
And available time slots should be highlighted
And express/urgent options should be clearly marked with additional costs

Scheduling Rules:

- Minimum 2 hours advance booking for standard service
- Express service available with 50% surcharge

- Weekend/holiday bookings have 25% surcharge
- Peak hours (7-9 AM, 5-7 PM) have 15% surcharge

AC-004: Special Instructions and Requirements

Given I need to specify special handling requirements
When I add special instructions (contact persons, access codes, handling requirements)
Then instructions should be validated for completeness
And additional costs for special services should be calculated
And special requirements should be flagged for driver assignment

Special Requirements:

- Multiple pickup/delivery points
- Specific loading/unloading equipment needed
- Security escort requirements
- Time-sensitive delivery windows
- Customer representative presence required

AC-005: Real-time Quote Generation

Given I have completed all booking details
When I request a quote
Then the system should calculate pricing based on distance, weight, cargo type, and timing
And quote should be displayed within 5 seconds
And quote breakdown should show all cost components
And quote should be valid for 24 hours

Pricing Components:

- Base rate by truck type
- Distance charges (per km)
- Weight charges (per kg above base weight)
- Special cargo surcharge
- Time-based surcharge
- Fuel adjustment factor
- Government taxes (VAT)

Story CJ-003: Smart Truck Selection and Booking Confirmation

As a customer
I want to view available trucks with detailed information and make informed selection
So that I can book the most suitable truck for my cargo requirements

Acceptance Criteria

AC-001: Available Truck Display

Given I have requested a quote
When the system searches for available trucks
Then I should see trucks filtered by cargo compatibility
And each truck listing should show truck details, driver info, ratings, and pricing
And trucks should be sorted by best match algorithm
And estimated arrival time should be displayed for each truck

Truck Information Display:

- Truck type, capacity, dimensions
- Current location and distance from pickup
- Driver name, photo, rating (1-5 stars)
- Completed trips count
- Real-time availability status
- Vehicle age and condition rating
- Insurance coverage details
- Special equipment available

AC-002: Truck Comparison Features

Given I am viewing available trucks
When I want to compare trucks
Then I should be able to select up to 3 trucks for side-by-side comparison
And comparison should show all relevant details in tabular format
And I should be able to see price differences and unique features

AC-003: Driver Profile and Reviews

Given I am considering a specific truck
When I view driver details
Then I should see driver's profile with photo, ratings, review summary
And I should be able to read recent customer reviews
And driver's performance metrics should be displayed (on-time rate, damage rate)
And driver's certifications and experience should be shown

Driver Information:

- Years of experience
- Specialized cargo experience
- Language proficiency
- Safety record
- Customer satisfaction rating
- Recent performance trends

AC-004: Booking Confirmation and Payment

Given I have selected a truck
When I proceed to confirm booking
Then I should review all booking details in a summary
And I should select payment method (credit card, bank transfer, credit terms)
And I should accept terms and conditions
And booking should be confirmed with unique booking reference
And confirmation details should be sent via email and SMS

Payment Options:

- Online payment (credit card, debit card)
- Bank transfer with reference number
- Corporate credit account (if approved)
- Pay on delivery (for approved customers)
- Split payment (partial advance, balance on delivery)

AC-005: Booking Modification and Cancellation

Given I have a confirmed booking
When I need to modify or cancel the booking

Then I should be able to modify details up to 2 hours before pickup
And cancellation should be allowed with appropriate fees based on timing
And driver should be automatically notified of changes
And refund process should be initiated for cancellations (if applicable)

Modification Rules:

- Free modifications up to 24 hours before pickup
- 10% fee for modifications within 24 hours
- 25% cancellation fee within 24 hours
- 50% cancellation fee within 2 hours
- No refund for no-show or last-minute cancellation

Story CJ-004: Real-time Shipment Tracking

As a customer
I want to track my shipment in real-time with detailed status updates
So that I can monitor progress and plan accordingly for delivery

Acceptance Criteria

AC-001: Live GPS Tracking

Given my booking is confirmed and driver is assigned
When I access the tracking page
Then I should see real-time truck location on an interactive map
And truck movement should update every 30 seconds
And estimated arrival time should be updated based on current location
And route should be displayed with completed and remaining portions

Map Features:

- Satellite and street view options
- Traffic conditions overlay
- Zoom and pan functionality
- Pickup and delivery markers
- Current truck position with heading indicator

- Geofenced areas (restricted zones, checkpoints)

AC-002: Delivery Status Updates

Given my shipment is in transit
When there are status changes
Then I should receive automatic updates via SMS and push notifications
And status timeline should be updated in the app
And estimated delivery time adjustments should be communicated

Status Updates:

- Driver dispatched and en route to pickup
- Arrived at pickup location
- Cargo loaded and departure confirmed
- En route to delivery with real-time location
- Arrived at delivery location
- Cargo delivered and signed off

AC-003: Communication with Driver

Given I need to communicate with the driver
When I use the in-app communication features
Then I should be able to call the driver directly (masked phone number)
And I should be able to send text messages through the app
And communication history should be maintained
And emergency contact options should be available

Communication Features:

- Click-to-call with masked numbers for privacy
- In-app messaging with delivery confirmation
- Voice message capability
- Photo sharing for cargo condition
- Emergency contact to operations center
- Translation support for multiple languages

AC-004: Delivery Proof and Documentation

Given my cargo has been delivered
When the driver completes delivery
Then I should receive delivery confirmation with timestamp
And proof of delivery documents should be available (photos, signature)
And delivery report should include any damage or discrepancy notes
And invoice should be generated and sent automatically

Delivery Documentation:

- GPS coordinates and timestamp of delivery
- Digital signature capture
- Photos of delivered cargo
- Any damage assessment with photos
- Delivery person identification
- Special instructions compliance confirmation

AC-005: Delivery Analytics and Feedback

Given my delivery is completed
When I review the trip details
Then I should see comprehensive trip analytics
And I should be able to rate the driver and service
And I should be able to provide detailed feedback
And trip data should be stored for future reference and dispute resolution

Analytics Provided:

- Total distance traveled vs. planned route
- Actual vs. estimated delivery time
- Route efficiency analysis
- Fuel consumption (if available)
- Driver performance metrics
- Cost breakdown and comparison with quote
